Hi Fred,

The 3 days courses I attended gave me a totally different insight on how the market works. You are right Fred, that market does not necessarily move with fundamentals, but with the hidden composite men.

I have benefited a lot from the seminar and the actual charts you used during the seminar proved to me that the charts are reliable indicators for selling and buying. Of course, there are other uses of the charts for the purposes of trading, which you had in great simplicity explained the technical jargon in plain language.

I will be meeting again with you in the near future to get to know what is in the mind of the traders and also to mingle around with other students and alumnis.

Dear Fred,

I must admit, I have been to courses in other places, but in term of technical analysis PI Capital is the best in Malaysia. Your technical analysis is parallel best with the well known world-standard analysis. I am planning to stay long term with PI Capital being a PI Graduate.

Dear Fred Tam,

Thank You for your seminar. It is really good. My wife and I appreciate it very much. Your course material, software and your lectures on trading are all excellent. In Asia, I think you are the best speaker in technical analysis. Your books are excellent as well.

Dear Fred Tam,

Below is a post-class evaluation of your F-1 Trader Charting Course which I attended on the 27-28 August 2005, followed by mentoring and hands-on practice on the Japanese Candlestick and Superchart Software.

“Fred provided us a very comprehensive knowledge about Technical Analysis in his two-day class. He followed up with mentoring where we learned the skills hands-on with the computer Charting software, guided by Fred himself and his staff.

The process of helping the participants “learn how to fish” from class room knowledge to hands-on coaching where we acquired skills is the right way to learn.

Fred shares his knowledge freely until you master the skill to be on your own. I doubt if we can find another trainer who does that.

Fred’s commitment to our learning is reflected in the amount of time he committed to coach the participants. If anyone wants to invest in stocks, options or futures, I believe knowing Technical Analysis will give one an edge.

As a trainer to CEOs and seminar managers, I truly believe that, it is knowledge and skill, which greatly determine winners from losers. Fred’s course definitely increases our knowledge and skill and our chance to be winners.

It is difficult to find a trainer and mentor in Technical Analysis as committed as Fred.

I believe, the skills we learn will help us minimize our losses and multiply our gains. We will be able to have and use the tools like the pros to make systematic and better decision as to when to buy and when to sell our stocks, options or futures.

I strongly recommend this course to anyone who plans to invest/trade in stocks, options or futures. I decided to sign up for the course immediately after the preview session. Two weeks after the class and the hands-on mentoring session, I am convinced I made the right decision.

Thank You Fred for “teaching us how to fish”.
