PI WEEKLY COMMENTS FOR MONDAY, DECEMBER 14, 2009: Sell KLCI 1248.57 OL. Lower liners remain flat to lower. S.A.

NEW STOCKS-TO-WATCH: NIL.

STOCKS WITH SELL SIGNALS: DIALOG.

STOCKS WITH TAKE PROFIT SIGNALS: NIL.

EXISTING STOCKS-TO-WATCH (Buy): NIL.

HOW TO TRADE ON MONDAY (DEC 14 2009):

Aggressive trader: DIALOG.

Conservative trader: NIL.

LONG TERM INVESTOR: S.A./HOLD IF STOP LOSS NOT HIT/SELL IF STOP HIT!

STOCK MARKET OUTLOOK: Forecast for Monday: Sell KLCI 1248.57 OL. Lower liners remain flat to lower. S.A.

On Friday close the KLCI was higher by 0.10 points or 0.01% at 1260.00 on relatively low volume of 528 million shares traded. Decliners led advancers by 291 to 289 with 241 stocks unchanged.

- 1. The KLCI remained steady on Friday to close at 1260.00.
2. As it did not close below 1248.57 or lower there is a chance the KLCI may rebound.
3. We only sell if the KLCI can close at 1248.57 or lower.
4. Why we say there is still chance of a rebound is also because the 10-50 moving average is still bullish.

5. Also, we observed that the Ichimoku chart is still bullish. This being the case, we are not writing off a rebound.
6. There is, however, no stock-to-watch for Monday.
7. Gold fell back down to the 1115.80 on Dec 9, 2009, rose to 1142 on Friday before coming back down to test 1115.
8. We would either (1) Stay aside, or (2) Re-enter buy as a doji was seen on Dec 9 at the oversold area of 1115.0.
9. We would place new sell-stop @ 1102.0 OL, just below the 62% Fibonacci support of 1104.
10. The U.S dollar is strengthening again, causing the foreign currencies to weaken and causing a lot of turbulence in currency trading. Some of our stops were hit like GBP and NZD and we are out of the market now. For EURO and AUD we are still in as the have not hit our stop yet.

**CONCLUSION:** The KLCI has hit a major Elliot wave target of 1285-88. The KLCI rebounded but is still a stay out signal. For conservative investors, do not re-enter until it close at 1288.43 OH. For aggressive traders, enter @ 1261.35 or higher (Fast buy signal). Lower liners are losing steam too. As such it is best to stay aside till volume returns. Re-enter long gold but place new sell-stop at 1102 or lower to exit longs. We see new target at 1184.

Upside Targets: 1250/1285-88 (hit!)/1305 (Revised targets on 14/10/09)

Immediate downside targets: 1233/1200 (Revised on 19/11/09)

Ichimoku chart: Span B support: 1212 (Revised on 30/11/09)

### TRIPLE SCREEN READING WITH THE F-1 TRADER SYSTEM

**P.I.-System Trader (Daily)** – Triggered a "sell" signal on Dec 7, 2009 at 1265.36 (Will trigger daily buy signal @ 1262.65 OH by today's close)

**P.I.-System Trader (Weekly)** – Triggered a "buy" signal on Sept 11, 2009 at 1208.28 (Will trigger a weekly sell signal @ 1248.57 or lower by Friday, Dec 11, 2009 close).

**P.I.-System Trader (Monthly)** – Triggered a "buy" signal on May 4, 2009 at 1009.36 (Will trigger a monthly sell signal @ 1202.39 or lower by Dec 31, 2009 close).

**P.I.-System Trader Triple Screen: "Sell-Buy-Buy"** – Short-term Weak, Medium term Strong and Long Term Strong: 3 screen buy – Short term Weak, Medium term Strong and Long term strong. Index linked stocks weak-neutral. Lower liners weak. Stay aside.

### FOREX / GOLD OUTLOOK

**FOREX (U.S. dollar strengthened but has not triggered a buy/Gold undergoing correction):** For Euro, AUD and ringgit we are still long but watch out for stop loss. As for GBP and NZD we are out for now. We were stopped out in gold at 1123.0. Short term re-enter at market (1123) and place sell-stop at 1102 OL. Target is at 1184.

Next two targets for gold is still 1290/1450. Target 1290/1450.

### STOCK INDEX FUTURES OUTLOOK

**Stock index futures: Maintain short/Buy-stop @ 1276 OH**

DEC futures closed high 2.0 at 1256.0 with relatively low volume of 1785 lots.

1. We remain short at 1254.0.
2. Take profit level is at 1232.5 or 1198.5.
3. Buy stop is at 1276 OH.
4. The Ichimoku is bearish on the Tenkan-Kijun sen.
5. Note that the Chikou span is also turning bearish. Two out of three lines are now bearish.
6. **The Ichimoku chart is now slightly bearish. Chikou span is bearish but Clouds reveal long term bullishness while the Kijun-sen is greater than the Tenkan-sen suggesting short term bearishness.**

**General commentary:** Turn short but place buy-stop @ 1276.0 OH.

Upside target: 1255(hit)/1286/1300-1309 (Revised on 14/10/09)

Downside targets: 1232.5/1198.5/1136 (Amended supports on 19/11/09).

Ichimoku chart: (Based on Kumo (clouds) FKLI rebounded and is now above the kumo and chikou span suggesting strength. Span B (Support) is now 1203 (Updated on 19/11/09).

**Average True Range for KLFE:** A.T.R. is 8.11 points for FKLI futures. This implies you need to put a stop above/below this A.T.R. or you can get stopped out due to the volatility factor. We advocate a 1.5 x or 2 x the ATR. We are using a 5 days ATR.

### CRUDE PALM OIL FUTURES

#### Crude palm oil futures: Maintain Long/Sell-stop @ 2472 OL

FEB CPO futures closed up RM9 to 2530 on relatively low volume of 8210 lots.

1. CPO traded sideways on Friday before rebounding RM5 to close at 2530.
2. We are maintaining longs as price did not close below the long white candle at 2473.
3. Secondly, price did not close below the high of 26/11/2009, i.e. 2521. A "bullish flag" was formed that could lead to an upside breakout today. Further buy @ 2591 OH.
4. Place sell-stop just below the low of the long white candle, at 2472 OL.
5. The next higher target is expected at 2651.
6. Short-term as reflected by the Tenkan-Kijun sen, CPO is still a "buy". Longer term as reflected by the "Chikou span", CPO is "Up" while CPO is "Bullish" if based on the "kumo" or "clouds".
7. **The next chart targets are 2651/2799 and the next Elliot target is 2850.**

**General commentary:** Based on kumo (clouds), CPO is long term bullish. The tenkan-sen is now above the kijun-sen which suggests short term bullishness. Chikou span is slightly above price which suggests "bullishness long term". Three out of three indicators is showing BULLISH signals. Long term is still a "buy" and short term we bought @ 2524.

**NOTE:** If you are an intra-day player or a trader with a small capital, you should NOT use these daily stops which is too much of a risk if it is triggered. We strongly suggest you to use the lower time frame charts like the 3 minute or 15 minute chart and use appropriate stops like pivot stops, and 1 or 3-bar stops to protect losses.

**Next upside targets:** 2651/2799/2850 (Revised on 4/11/09)

**Downside support:** 2521/1925-1900 (Revised on 4/9/09)

Kumo support (Span A): 2160 (Revised on 4/12/2009)

**Average True Range for CPO:** A.T.R. is 54.36 for CPO. This implies you need to put a stop above/below this A.T.R. or you can get stopped out due to the volatility factor. We advocate a 1.5 x or 2 x the ATR. We are using a 5 days ATR.
