

## **H/ F TECHNICAL ANALYST**

### **Company**

Exane is a leading independent European investment company, specialising in three businesses:

- Cash equities, under the Exane BNP Paribas brand,
- Equity derivatives and structured products,
- Third-party asset management.

The company's historical client base is institutional and worldwide, comprising asset managers, insurance, credit companies, pension and hedge funds. The company also markets its derivatives products to private banking institutions and independent financial advisors.

Exane offers clients a high value-added service grounded in expertise in research, execution and a mature structured-products platform.

Exane is present in Paris, London, Frankfurt, Geneva, Zurich

### **Job Description**

As part of the quantitative research team, you participate in the development and drafting of forecast products for technical analysis on European equities.

On a daily basis, your role will be to identify buying and selling opportunities on those markets for our sales, traders and institutional clients.

You will work with our existing internal tools for statistics screening and elaborate back-tests of trading strategies.

### **Profile**

You have a postgraduate qualification in Finance from a University or Business School (Bac + 5 or equivalent) and have had a significant initial professional experience in this field.

A good working knowledge of the forecast methods used in technical analysis is essential (Bollinger bands, oscillators, chartist analysis, Point & Figure charts, filtering methods, etc...)  
Knowledge of software such as Bloomberg, Udata and Matlab is appreciated. Holders of the STA Diploma, or equivalent qualification, preferred.

A strong work ethic and good resistance to stress are tools which will allow you to evolve in this highly demanding environment.

You are a team player and feel at ease in both oral and written expression.

Fluent English is required for this position. French is not necessarily required as the main working language will be English.

The full-time position is based in Paris.
