

## **IDEAglobal**

IDEAglobal is a leading global provider of independent, actionable analysis for the investment community. IDEAglobal provides online research on fixed income and foreign exchange markets in over 80 different countries, and its clients include the world's largest financial institutions, hedge funds and central banks. IDEAglobal helps investors, institutions, and professionals manage money and quickly reach confident trading decisions in all major liquid markets worldwide, including bonds, currencies, financial futures, options. For the past fifteen years, IDEAglobal has been the benchmark supplier for players in the financial markets. New Services in Fixed Income, Emerging Markets and Credit Derivatives have led to our rapid growth. As part of our 2005 plans we are looking for a technical analyst.

### **Position/Title: Technical Analyst**

#### **Responsibilities:**

\* Provide written research on the financial markets, encompassing a chart based approach to provide commentary from an intra day standpoint all the way to strategic views. The technical analyst will also work closely with IDEAglobal's strategists to formulate an integrated strategy view on key markets. Client and media interaction are also involved in the position, as IDEAglobal is sought out for its views on the financial markets.

#### **Desired Qualifications/Background:**

- A qualification recognized by the Society of technical analysts, which could include the STA diploma.
- Prior working experience as a technical analyst including a clear track record of innovative research.
- Strong mathematical skills to undertake modeling
- Ability to interface easily with clients/media;
- Strong communication skills;
  
- **We Offer:**
  - \* Competitive compensation
  - \* A challenging learning environment
  
- All interested applicants should forward their resume to:
